Não ha saptaal algum, que nam mereça de occupar a attenção de  
hum verdadeiro sabio; nemham ha, por mais desprezavel que pareça, de que se nam  
possa esperar alguma utilidade. Elles são estimaveis pelas suas virtudes -  
medicinas, eriguerem hum particular estudo de todos os que se destinam ao curative  
dos enfermos; elles fazem que nam haya terreno algum, que se possa verdadeiramente  
chamar estéril, ou improprio de se aproveitar, fornecem humma grande parte de nos-  
sas alimentas, verem nos em infinitas cousas economicas, emerecam por consequente de ser  
estudadas relativamente a Agricultura e Commercio - *Arch. Comp.*  
de Botán. en prefat. pag. LXXV

Dans un faible âme, ce poëte enfermé,  
Du cours de la vie est-il donc animé?  
Amour, réparateur des âges & des maux,  
A-t-il senti les traits de tes ardeurs féroces?  
Ces charmes offerts à tes filets basés,  
Dont son sein est ému, et tendrement pressé?  
Sont des perphrasas que leur secrète influence,  
A des êtres mortels y donne la naissance?  
Et des vœux de fleurs sont le lit nuptial  
C'est à remplir la loi du bon conjugat.  
Mais, en la liberté j'arrose les crimes,  
Pourquoi se fait-il point de fils illégitimes?  
Et que l'honneur pourroit soustrait les vagabonds  
Aux horreurs des foyes, par qui les amonçons  
Intriquant leur esprit, en trouvant la mesure,  
Sur l'amour innocent en rejette l'empire.

Ce Poët. apud Dier. Thyr. &c. Nov. ad an. 1771 mens. Nov. pag. 204.
